No external, third-party libraries have been used. p5.sound.js and p5.js are the only libraries used.

The "Noise" and "Ridge Plot" visualisations were adapted from the code provided by UoL.

The "waves" visualization has adapted code from Daniel Shiffman's (The Coding Train) brightness mirror code. A link to the p5.js editor of Daniel's code and a link to his YouTube video on it can be found below

https://editor.p5js.org/codingtrain/sketches/nFOs57gVh - (Waves visualisation code)
https://www.youtube.com/watch?v=rNqaw8LT2ZU – (Waves visualisation video)

The Trap Nation visualization was inspired by the popular YouTube channel "Trap Nation". No code was adapted, I only drew inspiration from the art style. However, a link to the Trap Nation channel can be found below.
